

# Testimonials

*"We have been using FileGenius for about two years to host our FTP site. We changed to FileGenius because their pricing was very good compared to the company we used previously. The pleasant surprise for us was the level of service provided by FileGenius. We found the company provided us a good interface for our customers to access our FTP site, a strong commitment to continually improve the usefulness of the FTP interface and a high level of responsiveness from Keith Bumgarner, one of the principals. FileGenius encourages customers to give input on how they are doing and ways to improve the product and they really listen to what their customers have to say. I strongly recommend FileGenius for any company's FTP hosting needs."*

*"I continue to be EXTREMELY pleased and impressed with the quality of your product. And the only reason I haven't raved about your technical support lately is because I haven't needed any."*

**Kevin Land**

Halma-Jilek Court Reporting Inc.

*"FileGenius has filled our file submission/sharing needs and has continued to grow beyond those needs, by improving and giving us more options than we initially thought we needed."*

## Testimonials

*"I am happy to highly recommend FileGenius by Applied Answers, Inc.! Their browser-based FTP solution solved myriad issues we were experiencing with application-based solutions. Even better, however, is the level of contact maintained by Keith Bumgarner and his staff regarding service improvement upgrade progress and possibilities, valuable trouble notices, and other internet news we can use. Their service is, quite simply, unparalleled!"*

*"FileGenius is not only the most secure web-based file transfer service available, but its interface is a dream to use for both user and administrator. Because the only branding on the site is our own, we get a lot of compliments from users both inside and outside our network. The upcoming release of Active Directory Integration will be another welcome addition to the already rich feature set. Brilliant, super-secure design, elegant, easy-to-use interface, and loaded with logical functionality under the hood, this is one business decision that was easy to make."*

*"FileGenius has been an invaluable time-saving tool in our busy Civil Engineering, Landscape Architecture and Planning firm. Other file transfer services didn't look professional, and FTP was not very user-friendly. We can customize our FileGenius site with our logo and sending large files to clients and consultants is simple and quick."*

**Jason E. Bajor**, ASLA
